## 2 Improve the improvement cycle and improve quality

In design and engineering, development proceeds with a quick check at hand, accelerating the improvement cycle and maximizing device performance to achieve the ideal product.

Before

After

## 3 Possible scope of application

Applicable to a variety of “Connecting People and Vehicles” developments.

Driver Monitoring System

Drive recorder

In-vehicle Infotainment

Car navigation system

Power tailgate

Digital tachograph

Power sliding door

Meter cluster panel

HVAC

Active Sound Control

Immobilizer

Acoustic Vehicle Alerting System

ETC on-board equipment

*CRIWARE for Mobility*
